

# The Worst Assignment Template in the World

Rem Collier / 55000111 / Group 0

## **Synopsis:**

Write your synopsis here [1] – you can use the following questions as a guide for the synopsis (don't use them as headings – in fact, please don't use headings at all):

*What is the paper about?*

*What are the main features / issues discussed?*

*What makes the proposed solution good (in the eyes of the authors)?*

*How was it evaluated and what did the evaluation show?*

===== THIS SHOULD NOT GO ONTO PAGE 2 =====

## Reading Group Comments:

- It is very important not to forget your comments. We will check that the comment you give in the reading group is one of the ones listed here. Each one should be no more than 3 sentences. *Obviously, this comment is not correct because I have used 4 sentences!*
- When you add references above, what I am really looking for is for you to cite those references in the synopsis, for example you could highlight a limitation of the system reviewed, pointing out that the criticism was taken from another paper/article/website, even quoting from that other paper. *Note: this is a bad comment because the sentence is too long!*
