

- 1.) Create a folder called 'dsa1' on your *Desktop*.
- 2.) Fire up the *Eclipse* program.
- 3.) As *Eclipse* starts, a screen prompt similar to the following picture should appear:

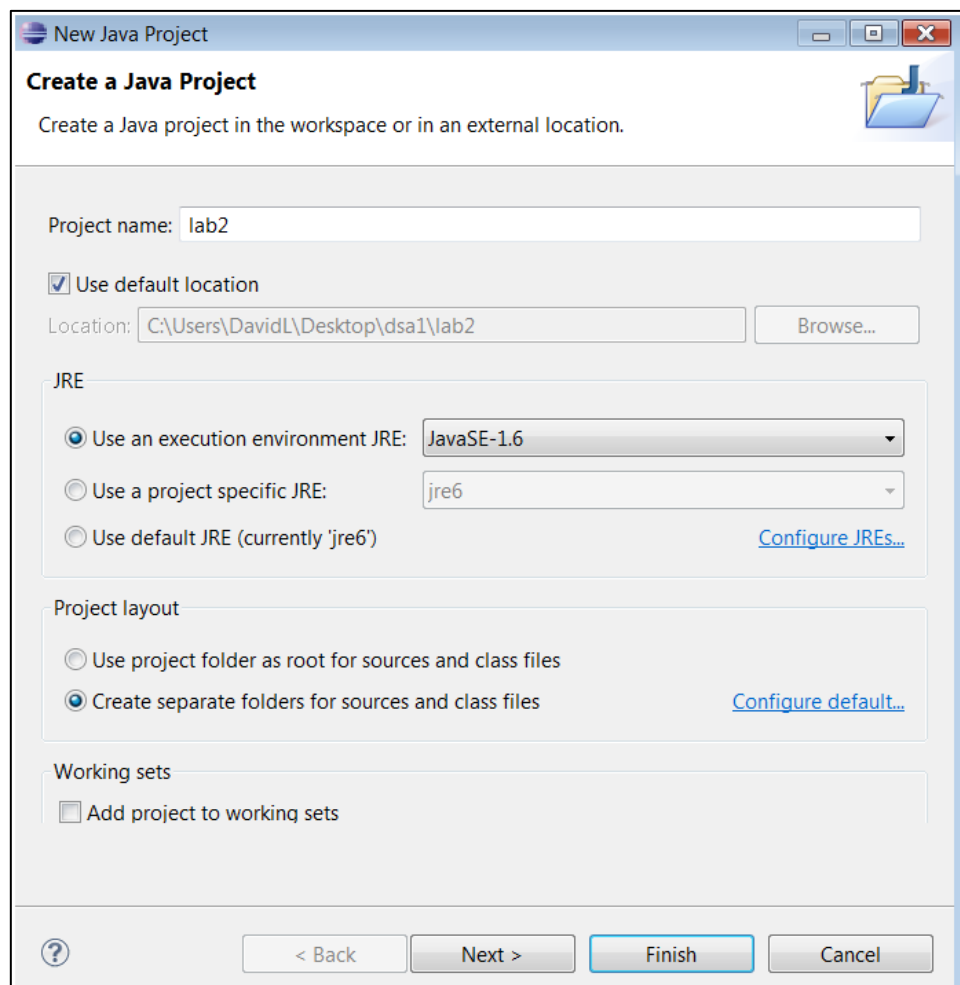

- 4.) Use the *Browse...* button to navigate to the newly created 'dsa1' folder on the *Desktop*. Click *OK*.
- 5.) After *Eclipse* finishes starting, the *Workbench* view should be empty as shown below:

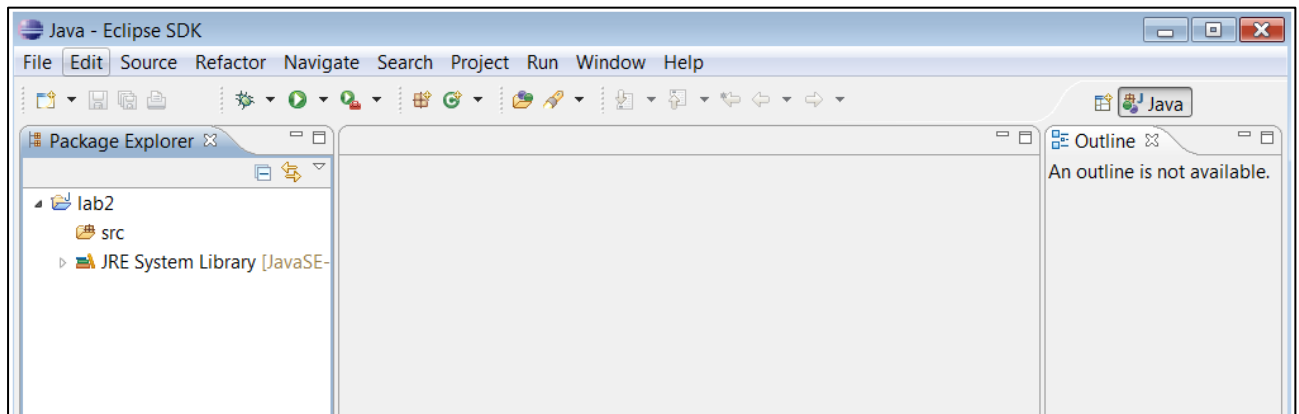

- 6.) Create a new *Java* project:
File -> New -> Java Project

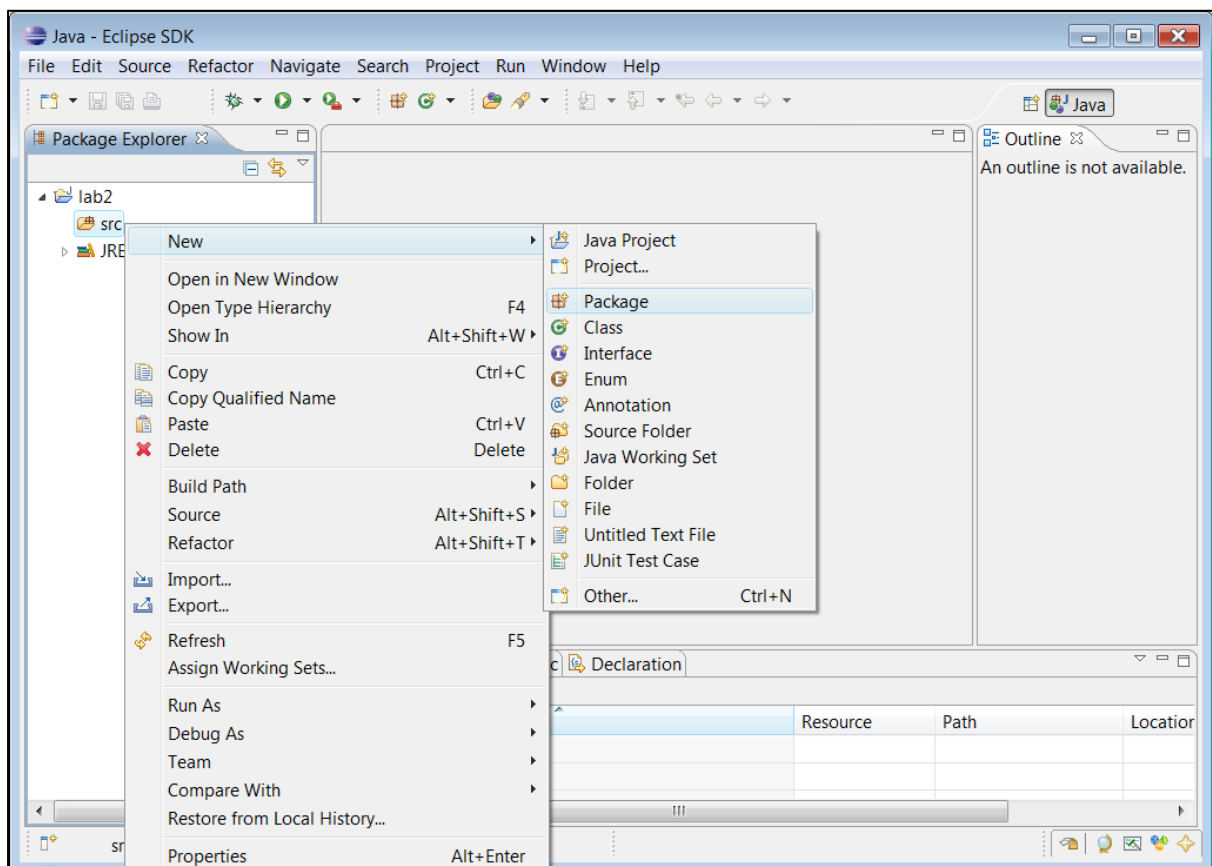

7.) Call the Project name 'lab2' and click the *Finish* button at the bottom of the window.

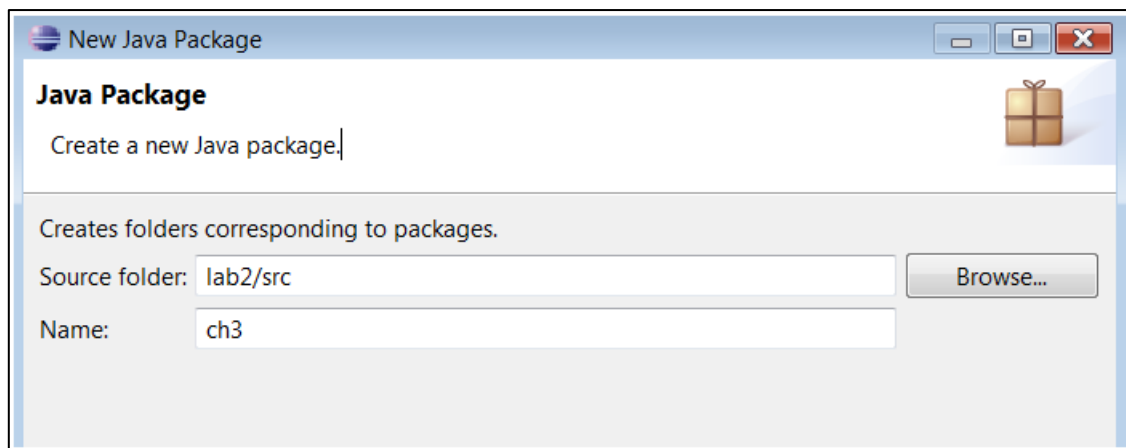

- 8.) The *Package Explorer* should have been updated to display the newly created project, as shown below:

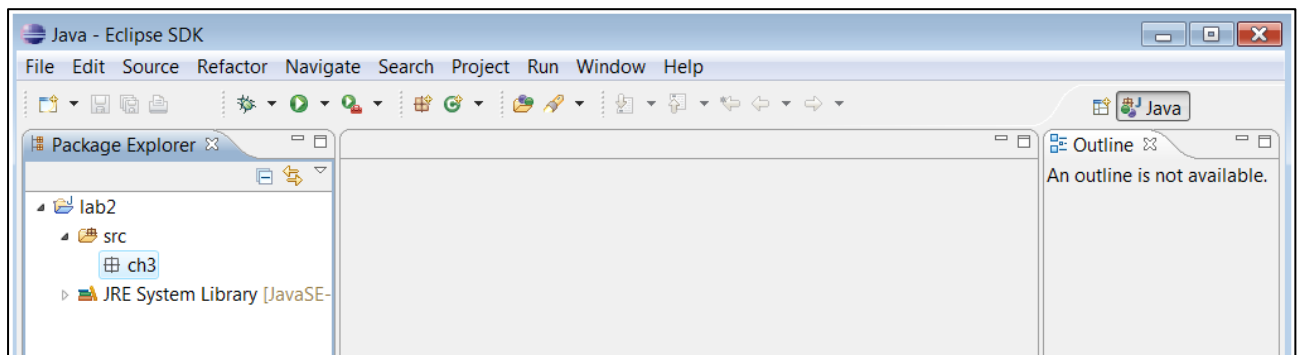

- 9.) Right-click on the 'src' package, in the *Package Explorer* view, and select *New -> Package*.

- 10.) Name the package 'ch3' (It will contain the exercises for Chapter 3), as shown below:

11.) The *Package Explorer* should now look as follows:

12.) Repeat steps 9 & 10 to create a second package called 'ch4' (For the exercises in Chapter 4).
Eclipse should then look as shown below.
