

Importing an Eclipse Project

1. Go to: File > Import
2. Click “Existing Projects into Workspace”
3. Click “Next”

4. Select “Select archive file”
5. Browse and select the file “COMP47580-2018-2019-NP.zip”
(i.e. the zip file you downloaded from Moodle)
6. Click on Finish
7. Done – the project should now be imported.

The screenshot shows the 'Import' dialog box in Eclipse, specifically the 'Import Projects' tab. The title bar says 'Import'. Below the title bar, there's a sub-header 'Import Projects' and a description: 'Select a directory to search for existing Eclipse projects.' To the right of this text is a folder icon. The main area has two radio buttons: 'Select root directory:' and 'Select archive file:'. The 'Select archive file:' option is selected, and its text field contains 'ony/Desktop/COMP47580-2018-2019-NP.zip'. To the right of each radio button is a 'Browse...' button. Below these is a section labeled 'Projects:' containing a list box with one item: 'COMP47580-2018-2019-NP (COMP47580-2018-2019-NP/)', which is checked. To the right of the list box are three buttons: 'Select All', 'Deselect All', and 'Refresh'. Below the 'Projects' section is an 'Options' section with three checkboxes: 'Search for nested projects' (checked), 'Copy projects into workspace' (checked), and 'Hide projects that already exist in the workspace' (unchecked). Below the 'Options' section is a 'Working sets' section with a checkbox 'Add project to working sets' (unchecked) and a 'New...' button. Below this is a 'Working sets:' label followed by a dropdown menu and a 'Select...' button. At the bottom of the dialog are four buttons: a help button (question mark icon), '< Back', 'Next >', 'Cancel', and 'Finish'.

Import

Import Projects
Select a directory to search for existing Eclipse projects.

☐ Select root directory:

☒ Select archive file:

Projects:

<input checked="" type="checkbox"/>	COMP47580-2018-2019-NP (COMP47580-2018-2019-NP/)	<input data-bbox="1145 969 1316 1003" type="button" value="Select All"/>
-------------------------------------	--	--

Options

☒ Search for nested projects
☒ Copy projects into workspace
☐ Hide projects that already exist in the workspace

Working sets

☐ Add project to working sets
