

Unified process is a framework
 - IBM, Rational Unified Process
 + other sects

- enterprise up
- agile up
- Rational Unified Process

agile

... Coding Fix ... = agile?

- waterfall (Trad) / Agile

↑
 Failure

↑
 Successes

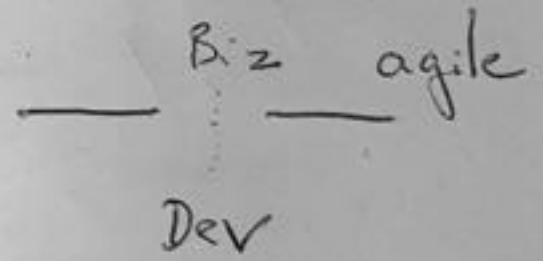

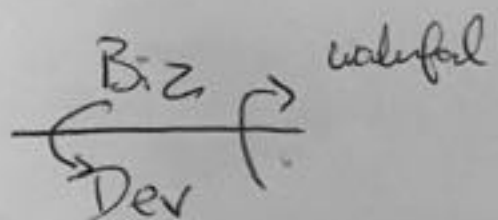

- manifesto

Define

- individual & interaction
- working software
- customer collab
- respond to change

Coding fix

- code & fix error
- process

What is imagile!

- user stories
- spikes - upfront analysis
- iteration processes + 2-3 weeks long
- Not fixed

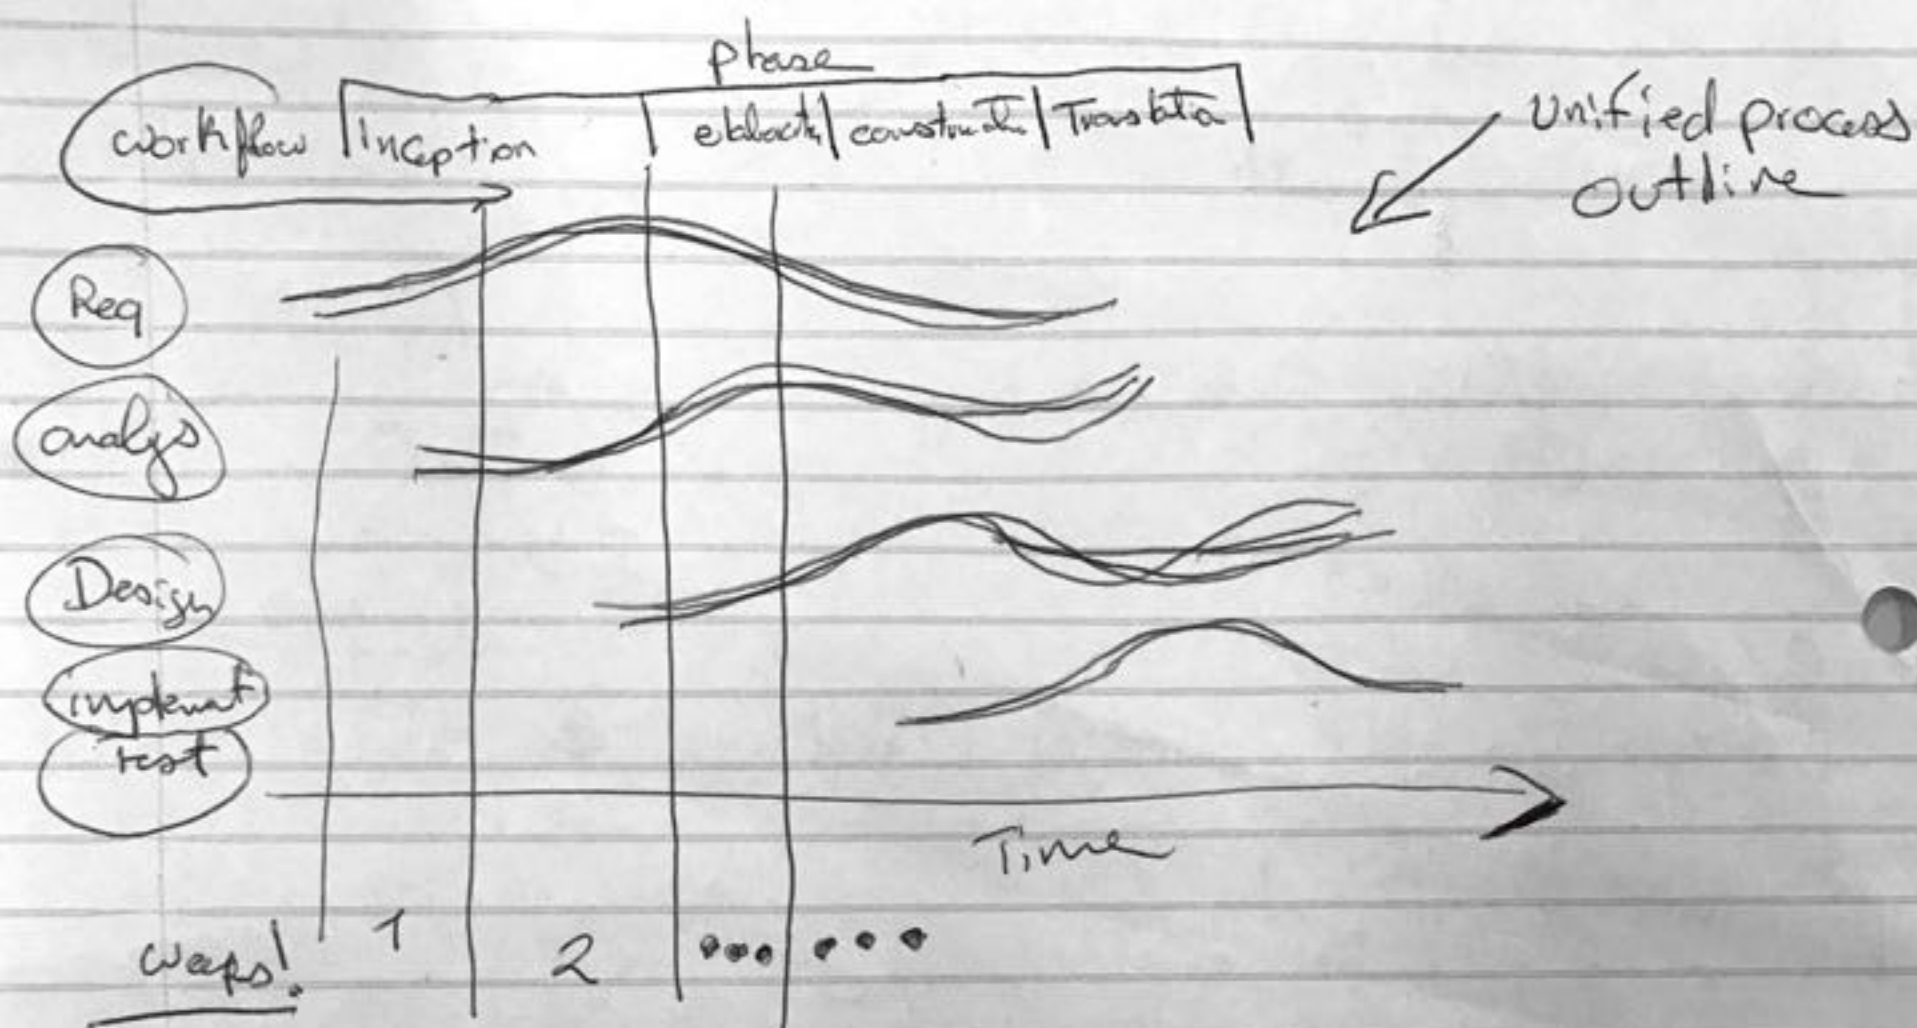

- customer can consider

→ team L → project builder with Reflection

→ emphasis of coding quality L → dev

~~waterfall~~ → unified process!

Analysis
Design
Code
Test
Maint

Inception
Spike

use case model: what a model does
→ Should be short

Elaboration: Domain analysis = Key classes in the domain
Architecture Baseline: Executable

→ Domain analysis then → architecture Baseline

Construction

low level modeling

UML (sequence or collaboration models)

Pro:

includes all aspects of SFT Dev, Plan, Test, BDFU +

Con:
