How to Export Source Code Using Eclipse
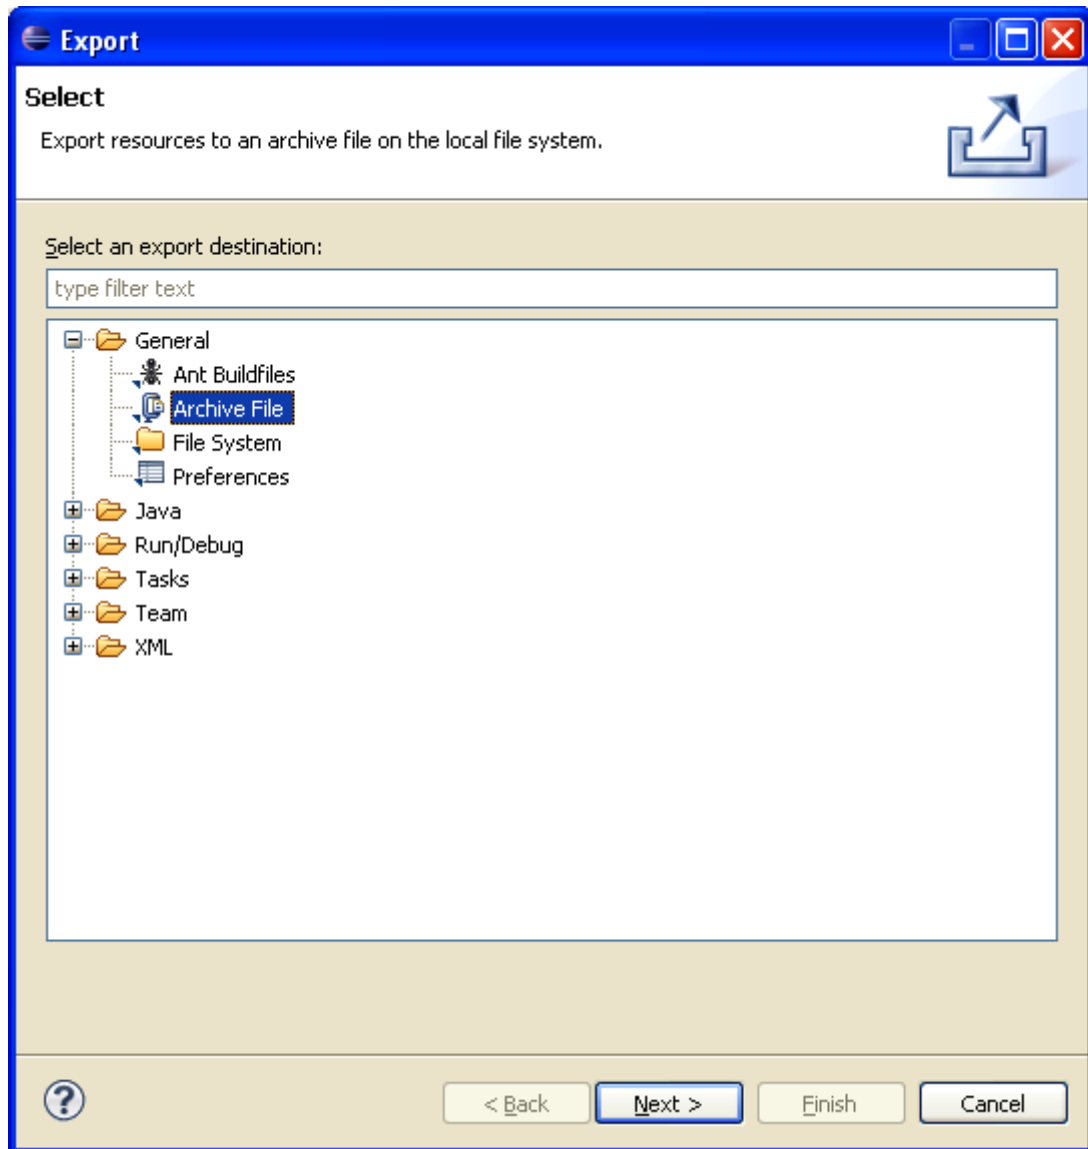

1.) Select all the source files (.java) in the package.

2.) From the *File* menu, choose *Export...*

3.) Highlight the *Archive File* option by clicking on it (as shown below!) and then select *Next >*

4.) Rename the zip file as your student number and save to the desktop (e.g. below the student *John Smyth* has student number *09084561*). Select *Finish*.
